Presentation Roadmap

01 BUSINESS OVERVIEW & KEY FINDINGS

02 REVENUE & PROFITABILITY ANALYSIS

03 REGIONAL PERFORMANCE ANALYSIS

04 SALES TRENDS & SEASONALITY

05 CUSTOMER PURCHASING BEHAVIOUR

05 STRATEGIC RECOMMENDATIONS

Executive Summary: Key Findings & Strategic Opportunities

Revenue is concentrated among a small portfolio of brands

Ford, Chevrolet, Nissan, Toyota, and BMW are the largest revenue contributors, indicating concentration risk and inventory dependence on a small number of brands.

Vehicle price is strongly influenced by mileage and age

Selling price declines as vehicle mileage increases, while newer vehicles consistently achieve higher average selling prices, reinforcing the importance of inventory quality and age optimization.

Demand is concentrated in mid-range passenger vehicles

Customer demand is strongest for mid-range passenger vehicles, while premium and luxury vehicles generate stronger profit margins despite lower sales volumes..

Sales are concentrated in a few high-performing regions

Florida, California, Pennsylvania, and Texas account for the highest sales volumes and revenue contribution, indicating strong regional demand and clear opportunities for dealership expansion and localized marketing investment.

Revenue growth is not consistently translating into profitability

Several high-volume brands and regions generate weak or negative profitability, indicating margin leakage likely driven by pricing inefficiencies, acquisition costs, or discounting practices.

Business Performance Snapshot

TOTAL REVENUE	TOTAL CARS SOLD	AVG SELLING PRICE
R 7.6 m	558 800	R13 611,36
AVG PROFIT MARGIN	TOP REVENUE BRAND	TOP REVENUE REGION
-15.07%	Ford	Florida

Bright Motors operates a high-volume, low-to-mid price model, generating over **R7.6bn** in revenue across **558k transactions**, but current average margins indicate profitability optimization opportunities.

Revenue is Highly Concentrated Among a Small Set of Vehicle Brands

- Ford is the largest revenue-generating brand (generating more than double the second-highest brand), followed by Chevrolet, Nissan, Toyota, and BMW.
- The top 5 brands contribute a disproportionate share of revenue which suggests Bright Motors is heavily reliant on a small portfolio of brands.
- Portfolio concentration creates exposure risk if demand shifts.

A Small Number of Models Drive Disproportionate Revenue Contribution

Top 10 Revenue Generating Vehicle Models

● Top-performing models contribute approximately **21% of total revenue**, indicating clear product winners.

Inventory allocation should prioritize these models to reduce stock inefficiencies and improve turnover.

Revenue Growth Is Not Translating into Profitability Across Key Brands

Top 10 Profit Generating Brands

- Despite strong revenue, several top-selling brands generate negative profits.
- Pricing inefficiencies, acquisition costs, or discounting practices are eroding margins.

Loss-Making Brands

Reassess pricing strategy, acquisition cost, and discounting practices for underperforming brands.

Sales Are Concentrated in a Small Number of High-Performing Regions

Top 10 Sales Regions

- Florida, California, Pennsylvania, and Texas represent Bright Motors' strongest sales markets.
- Regional demand concentration suggests opportunities for dealership expansion and localized marketing.

Prioritize expansion investment in top-performing states.

High-Revenue Regions Do Not Always Deliver the Strongest Profitability

Top 10 best performing Regions by Revenue

Top 10 Profit Generating Regions

● Some high-volume regions underperform on profitability, suggesting pricing inefficiencies or higher operating costs.

Conduct regional pricing and margin reviews.

Vehicle Sales Demonstrate Clear Seasonality Patterns

Car Volume sales over time

Monthly Sales Revenue

- Sales volumes peak in **January, February, and June**, indicating strong seasonality., with visible declines in lower-performing months.
- Lower-performing months present opportunities for promotional interventions.

Align procurement and marketing activity to seasonal demand cycles.

Revenue is Concentrated in Early-Year Quarters

Distribution of Quarterly Revenue

Volume of cars sold per quarter

Quarterly Profits

- Q1 accounts for approximately **62% of revenue** and **63% of sales volume**.
- Despite strong revenue concentration, profitability remains weak across all quarters.

Improve gross margin discipline during peak sales periods.

Sales Activity Peaks During Weekday Early Hours and Afternoons

- Transaction activity is highest on weekdays, particularly Tuesdays and Wednesdays.
- Sales are concentrated in early-day and afternoon periods.

Align staffing, lead allocation, and support operations to peak sales periods.

Vehicle Price Declines as Mileage Increases

Relationship between avg odometer and avg revenue

- Clear inverse relationship between mileage and selling price.
- Low-mileage vehicles consistently command premium prices.

Prioritize sourcing lower-mileage inventory where economically viable.

Newer Vehicles Command Higher Average Selling Prices

Revenue trend vs Year of Manufacturing

● Selling price generally increases with vehicle recency, with limited exceptions in vintage inventory.

Increase focus on newer inventory mix.

Customer Demand is Dominated by Mid-Range Passenger Vehicles

- Passenger vehicles dominate demand.
- Mid-range vehicles represent the largest sales segment.

Optimize inventory around mid-range passenger vehicles.

Automatic Vehicles Dominate Customer Demand

- Automatic vehicles significantly outperform manual sales.

Increase automatic vehicle stock mix.

Neutral Vehicle Colours Dominate Consumer Preferences

Customer Colour Preference

● Black, white, silver, and grey dominate demand.

Prioritize neutral colour inventory for faster turnover.

SUVs, Sedans and Utility Vehicles Represent Core Demand Segments

Top 10 Preferred Body Types

● customer demand clusters around practical vehicle types.

Optimise inventory mix towards high-demand body type

Recommendations to Improve Profitability & Operational Efficiency

Inventory Optimization

Increase inventory of top-performing makes/models
Reduce low-margin stock exposure

Margin Optimization

Review pricing and acquisition costs on loss-making brands/regions
Reduce discount leakage

Regional Growth

Expand dealership footprint in high-performing regions
Pilot targeted campaigns in underpenetrated markets

Product Mix Optimization

Prioritize:
mid-range vehicles
passenger vehicles
automatic transmission
low/medium mileage inventory

Seasonal planning

Align marketing campaigns and inventory procurement to Q1 and early-year demand peaks

Thank you
